

Ritecode.com Comprehensive ICD-9 / HCPCS / CPT Medical Coding Prep Course

Monday	Tuesday	Wednesday	Thursday	Friday
<i>Suitable for beginning coders</i>				<i>Class ends at 2:00 pm</i>
ICD-9 Coding Fundamentals	Evaluation & Management	Integumentary System	Respiratory System	Urinary System
Using the Index	E & M Terminology	Debridement	Nose & sinus procedures	Kidney Procedures
Coding 4 th and 5 th digits	E & M Components	Excision of benign lesions	Bronchoscopy procedures	Bladder Procedures
Multiple coding techniques	Determining level of service	Excision of malignant lesions	Thoracotomy/thoracoscopy	Ureter versus Urethra
Utilizing V & E codes	Description of E & M services	Wound repair		Biopsies
Neoplasm & Drug tables	Practical exercises	Grafts and flaps		
All major disease groups		Treatment of burns	Cardiovascular System	
		Destruction of lesions	Diagnostic services	Female Reproductive System
	Anesthesia	Breast Procedures	- Cardiac graphics	Contraception management
CPT Coding Fundamentals	Calculating units for billing		- ECG's & rhythm strips	Laparoscopy, hysteroscopy
General rules for CPT Coding	Special anesthesia modifiers		- Holter monitors	Hysterectomies
Organization of the CPT book	Qualifying circumstances	Musculoskeletal System	- Exercise stress tests	Maternity care & delivery
The index & cross-references	Obstetrical anesthesia	Wound exploration	- Echocardiography	
Surgical package		Fracture management	Cardiac catheterization	
Bundling rules		Arthroscopic procedures	PCTA	Male Reproductive System
Add-on Codes	Radiology	Bone grafting	CABG (Bypass grafts)	Coding guidelines
Surgical Modifiers	Diagnostic Radiology	Arthrodesis	Pacemakers	Laparoscopy guidelines
	Technical Component	Spinal instrumentation	Implantable infusion pumps	Prostate procedures
	Professional Component			
	Ultrasounds			
HCPCS Coding	Radiation oncology	Nervous System	Digestive System	Eyes
Format of the HCPCS book	Nuclear medicine	Function of the nerves	Endoscopic procedures	Cataract removal
The "Table of Drugs"		Pain management	GI dilation	Keratoplasty
Coding for supplies		Laminectomy/laminotomy	Intestinal procedures	Corneal transplants
	Pathology/ Laboratory	Spinal procedures	ERCP	Strabismus surgery
	Organ & disease panels		PEG tubes	
Modifiers	Chemistry		EGD	
Defining CPT modifiers	Surgical pathology	Medicine		Ears
Techniques for proper usage		Psychiatry		External/Middle/Inner
Practical examples		Vaccines		Myringotomy
		Infusions		Tympanostomy

Schedule:

Registration is 8:30am; Classes start at 9am and end at 4pm each day.

There is a one-hour lunch break. Friday's class will end at 3 pm.

Cost: \$1,000 per day plus all travel expenses plus \$25 per manual.

Every student for the complete Prep Course will also receive access to the **online version** for one year. The online versions include over 500 pages of text, 120 surgical Op Reports, over 600 test questions and 1200 hyper-linked terms.
